# Chapter 1

## Introduction

The general process in scoring a baseball match with the app is:

- Create a new sheet
- Record scoring events
- Share Score Sheet (as an attachment) on facebook, twitter or email. (or export it in the Premium version)

## Chapter 2

# Create a new sheet

You are initially presented with a blank screen with "New Sheet" and "Settings" enabled. Settings only contains a default home club setting.

Click "New Sheet" and enter in all the values presented.

The screenshot shows an iPad interface with a form for creating a new sheet. The form has the following fields:

- Home team:
- Visitor team:
- Played at:
- Weather:
- Umpire:
- Scorer:
- Date:
- Player one:
- Player two:
- Player three:
- Player four:
- Player five:
- Player six:
- Player seven:
- Player eight:
- Player nine:
- Player ten:

A keyboard is visible at the bottom of the screen. On the right side, a table is partially visible with columns labeled R, RBI, and E. The table contains several rows of data, all with zeros in the RBI and E columns.

Once passed that, all the buttons will be enabled.

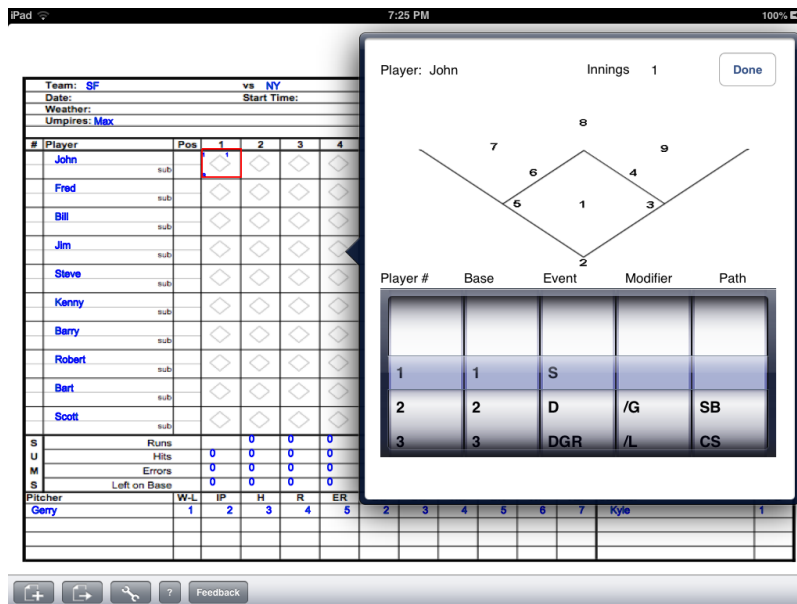

# Chapter 3

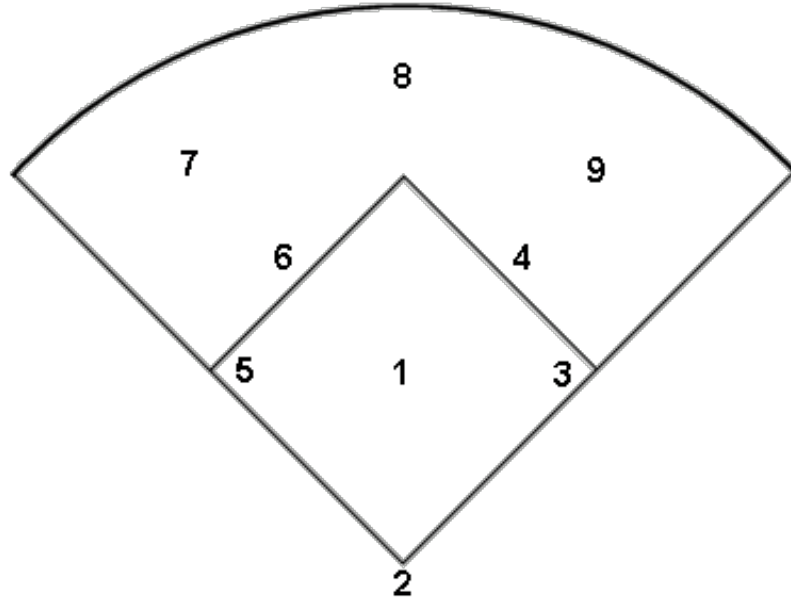

## Enter scoring events

Click "New Sheet" to start over.

Click a scoring event box with a faint diamond in it.

Once you are requested for information in one of the pop overs and simply tap away from it or press the button again and the information will be updated. If it needs more information than what is entered a little alert message box will appear requesting you complete all the fields.

Enter innings totals by touching any of the totals in the innings column.

ABC ABC

Enter pitcher and catch data by touching on the pitcher or catcher sections of

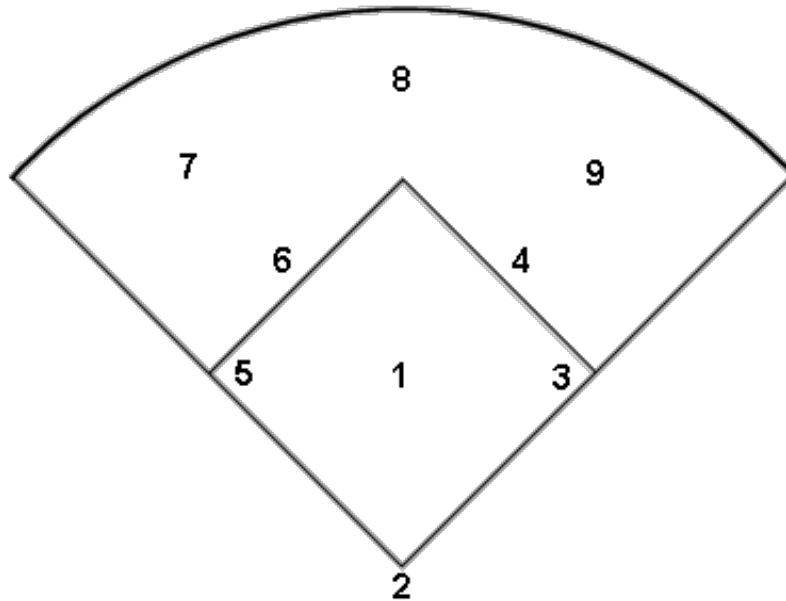

the form.

Touch the player totals to adjust the data for the player for all innings.

### 3.0.1 Meaning of scoring codes

#### Player #

Player numbers match the player numbers shown in the diamond above the scoring picker. 1 is the pitcher, 2 is the batter, etc...

#### Base

Base offers a choice of 1, 2, 3 or H. This is 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup> and Home.

#### Batter Events

**S** – Single  
**D** – Double  
**DGR** – Ground-Rule Double  
**T** – Tripple  
**H** – Home run  
**W** – Walk  
**IW** – Intentional walk  
**K** – Strike out  
**HP** – Hit by Pitch  
**FC** – Fielder's Choice  
**E** – Error  
**FLE** – Foul Ball Error

**Modifiers**

**/G** – Ground ball  
**/L** – Line drive  
**/FL** – FouL  
**/B** – Bunt  
**/TH** – Throw  
**/FO** – ForceOut  
**/GDP** – Ground ball Double Play  
**/FDP** – Fly Ball Double Play  
**/LDP** – Line Drive Double Play  
**/DP** – Double Play  
**/TP** – Tripple Play  
**/SH** – Sacrifice Hit (bunt)  
**/SF** – Sacrifice Fly  
**/I** – Interference

**Path**

**SB** – stolen base  
**CS** – caught stealing  
**PO** – pickoff  
**DOE** – pickoff error  
**BK** – balk  
**PB** – passed ball  
**WF** – Wild pitch

## Chapter 4

# Share / submit sheet

Once you have recorded all the scoring events of the match it is not much use unless you share it with someone. Click "Mail Sheet" and there will be an email with the image of the score sheet attached, for you to submit to your club or print later from elsewhere. app feedback button

Share your comments, suggestions, feedback or otherwise with us with the app feedback button to launch the mail app.

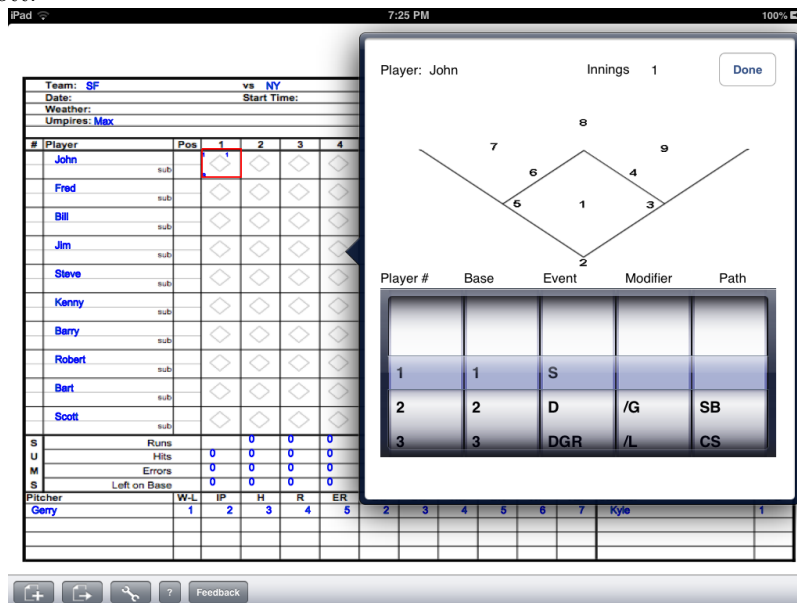

# Chapter 5

## Walk through

First we create a new sheet.

And then we enter in all the required information about the new sheet..

We have players John, Fred, Bill, Jim, Steve, Kenny, Barry, Robert, Bart, Scott.

Okay the match has started.

John is up to bat, so we touch in the first innings box next to the first batter (John). A pop over appears with Player John, Innings 1 a diamond and a picker. The pitcher throws to first base and John scores a single, so we choose 1 and 1 and S for Player, Base and Event. We click done.

We click in each scoring box in turn as the batters make the plays.

We touch under Patcher and enter Pitch and Catcher information.

We touch in the total areas and adjust the totals both under the players and to the right of the player/innings scoring area.

Feedback More

6.5 Open a pervious sheet

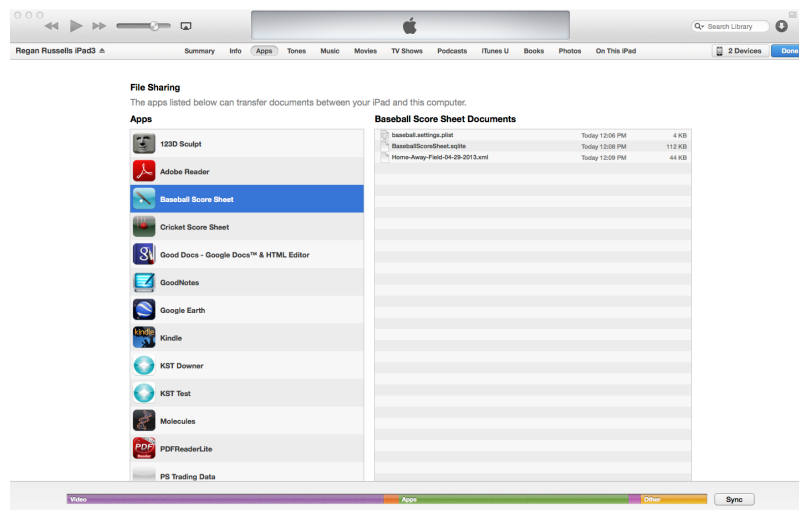

## 6.6 Closed sheet

## 6.7 Export

Connect your iPad to your Mac or PC. Launch iTunes if it is not started. Navigate to your iPad, select "apps", and scroll down to "File Sharing".

### 6.7.1 Sqlite

If you are computer expert you might know how to use sqlite. You can copy Sqlite database to any folder and use it anyway you wish.

### 6.7.2 XML files

Each sheet in the Baseball Score Sheet app will be available as an XML file. For example, here we can see a sheet titled "Home-Away-Field-02-29-2013.xml". This scoresheet could be dragged from iTunes to a folder or your desktop. This could be dragged to another iPad, or transferred to an Android tablet with the Android version of this app.

### 6.7.3 Future Premium features

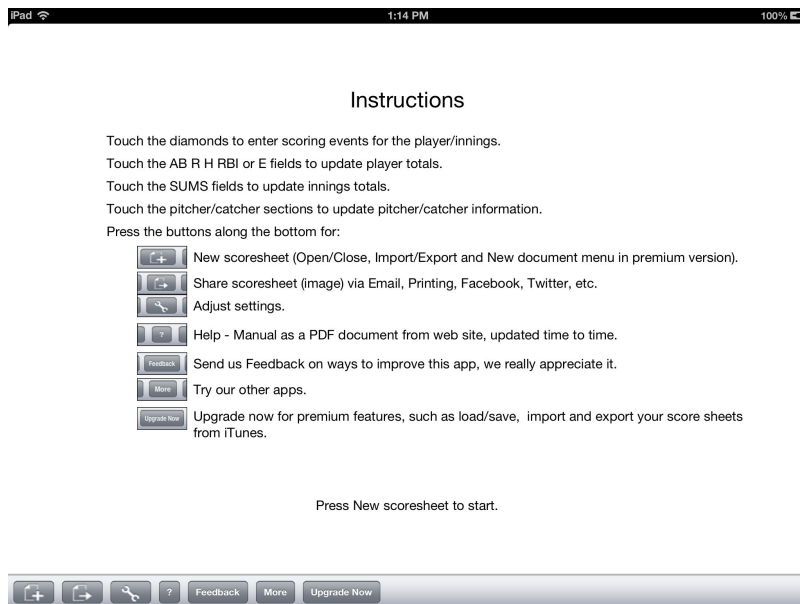

Currently iCloud integration is under development. Future versions of the app you will be able to enter a scoresheet in one iPad and a very short time later the sheet will be available to be opened in another iPad with the same iCloud account.

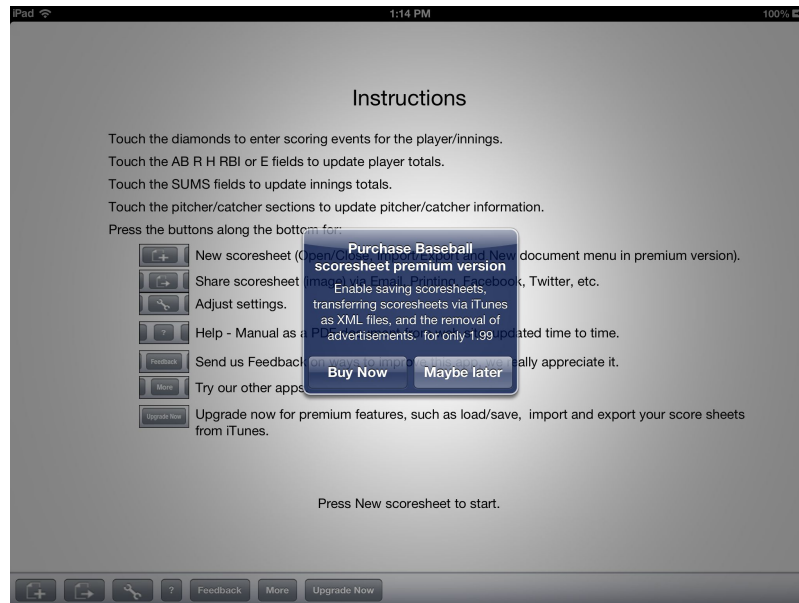

## Chapter 7

# Upgrading to premium features

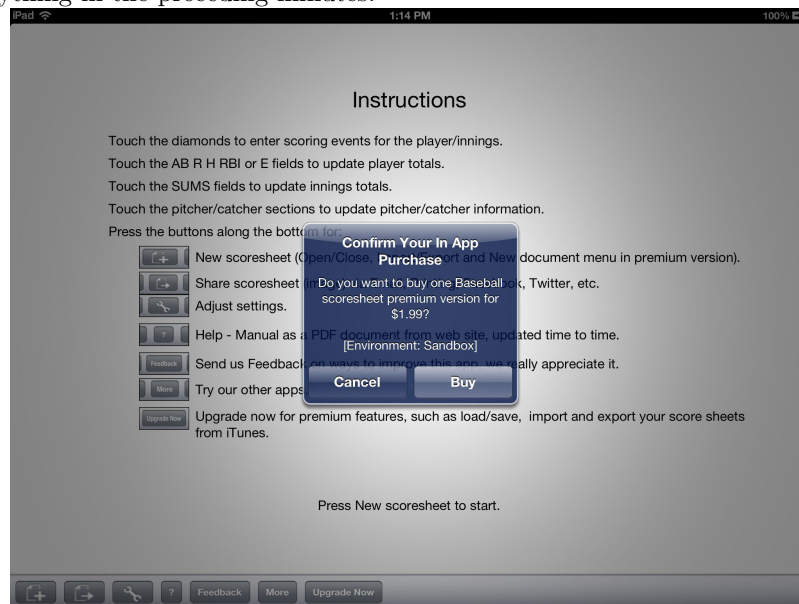

Click the "Upgrade Now" button along the bottom.

Choose "Buy Now"

Confirm your purchase with the iTunes app store. A login to your iTunes app store account might be required if you haven't downloaded or purchased anything in the preceding minutes.
